- Mentorship
- Books

PROFILE SUMMARY

- Full-stack software engineer with strong expertise in building dynamic, high-performance web applications.
- Frontend proficiency includes Next.js, React.js, and Tailwind CSS for creating responsive, user-centric interfaces.
- Backend experience spans both Node.js and Django, enabling the development of scalable APIs and robust server-side logic.
- Passionate about clean code, modern architectures, and delivering impactful solutions across the full development stack.

TRAININGS EXPERIENCE

African Leadership X

I'm completed the ALX Software Engineering program from August 2023 to October 2024, gaining extensive coding experience through daily challenges. During this time, he mastered both front-end and back-end technologies, focusing on Python, Flask, Django, and full-stack development.

BLOCKCHAIN

Won the 2025 ICP AI Hackathon with FinanceFit, showcasing expertise in blockchain technology and AI-driven financial solutions for innovation.

EDUCATION

Computer and Software Engineering

University of Rwanda | 08/2023 – 10/2027

ALX Tech training, Software engineering plus

African Leadership X | 8/2023 –10/2024
